

Comparison Guide

*A Consumer's Guide to Care System
Quality, Cost and Service*

Patient Choice Select

Plan Year 2008

Choosing High-Quality Care

Your Power as a Consumer. As a Patient Choice participant, you have the power to choose. And just like your other purchasing decisions, when making decisions about your care, you need the ability to gauge value in order to make informed choices. Fortunately, Patient Choice offers you comparative information that enables you to easily evaluate the cost, quality and service differences among provider organizations—and make choices that are right for you.

Comparison Shop for Your Health Care. When you enroll in a plan that uses the Patient Choice *Select* network, you and each of your family members select a group of physicians, hospitals and other health care professionals and facilities called a “Care System.”

This guide includes information to help you compare and choose those Care Systems that best meet your personal needs and budget. The Care System information is arranged alphabetically by cost group.

In the Patient Choice program, Care Systems are analyzed on measures of cost and performance, then tiered into low, medium and high cost groups. Cost groups can help you understand how Care System costs compare to one another, and may represent the amount you contribute toward the cost of your coverage. If cost is an important part of your decision, be sure to check what cost group each Care System falls into.

In this guide you’ll also find helpful information such as:

- **Bridges to Excellence Honorees.**
Find out the health care systems that earned the Minnesota Bridges to Excellence rewards.
- **Clinical Performance.**
Review the results of our “quality credit” program. Developed in partnership with participating Care Systems, the program measures Care System performance on their management of certain health conditions.
- **Patient Satisfaction Survey Results.**
See what other people said about their experiences at different Care Systems.
- **Customer Service Capabilities.**
Find out the types of services that are offered by each Care System.
- **Internet Capabilities.**
Determine a Care System’s ability to provide services via the Internet.
- **Hospital Patient Safety.**
Check the progress of network hospitals in implementing the Leapfrog Group’s recommended patient safety practices as well as their level of participation in the Institute for Healthcare Improvement’s 5 Million Lives Campaign.

Bridges to Excellence

Bridges to Excellence (BTE) is a national employer-led pay-for-performance program created to encourage improvements in care quality by recognizing and rewarding providers that deliver safe, timely, effective and efficient care to chronically ill patients.

The Minnesota BTE program is directed by a guiding coalition of employers, providers, health plans and organizations involved with quality reporting and improvement that set the performance goals and physician reward process. For 2007, the program rewarded providers that delivered optimal care to their patients with diabetes. The honorees are listed below, along with their affiliated Care System:

| Health Care System/Clinic | Care System Affiliation |
|--|---|
| AALFA Family Clinic—White Bear Lake | Minnesota Healthcare Network |
| Allina Medical Clinic—Farmington | Allina Medical Clinic Care System |
| Camden Physicians, Ltd—Minneapolis | Access Quality Care System |
| Fairview Cedar Ridge Clinic Fairview Chisago Lakes Clinic Fairview Crosstown Clinic Fairview Eagan Clinic Fairview Eden Center Clinic Fairview Elk River Clinic Fairview Hugo Clinic Fairview Lakeville Clinic Fairview North Branch Clinic Fairview Princeton Clinic Fairview Ridges Clinic Fairview RidgeValley Clinic Fairview Rush City Clinic France Avenue Family Physicians, PA Richfield Medical Group | Fairview Physician Associates |
| Fairview Red Wing Medical Center | Fairview Red Wing Health Services |
| Family Practice Medical Center of Willmar | Midwest Community Providers |
| HealthEast Downtown St. Paul Clinic | HealthEast Care System |
| HealthPartners Central Minnesota Clinics—St. Cloud | HealthPartners Central Minnesota Clinics |
| HealthPartners Como Clinic—Inver Grove Heights | HealthPartners Medical Groups and Clinics |
| MeritCare Medical Group—Halstad | MeritCare Health System |
| Park Nicollet Clinic— Eden Prairie, Minnetonka, St. Louis Park | Park Nicollet/Methodist Care System |
| Southdale Internal Medicine—Edina | Minnesota Healthcare Network |
| Western Wisconsin Medical Associates—Hudson Physicians, New Richmond Clinic and River Falls Medical Clinic - Ellsworth, River Falls, Spring Valley | Minnesota Healthcare Network |

Note: The Minnesota Bridges to Excellence program currently focuses on adult-based diabetes care. As a result, provider organizations that serve only pediatric patients are not able to participate.

Clinical Performance

This information shows the results of our program to evaluate Care Systems' health outcomes and care processes for asthma, coronary artery disease, diabetes care, and preventive care, as well as service and satisfaction levels.

Care Systems that chose to participate were scored in three categories, resulting in a corresponding "quality credit." These categories include:

- **Clinical Performance Level**—measures Care Systems on self-reported topics such as laboratory results and completeness of care as compared to best practices.
- **Care Processes**—refers to the Care System's infrastructure that allows them to identify and manage their patients' needs.
- **Patient Experience**—refers to patient-reported satisfaction with their care for each condition.

Hospital Patient Safety

Nearly a decade ago, the Institute of Medicine (IOM) estimated that 98,000 people die each year as result of errors that occur in hospitals—making medical errors the eighth leading cause of death in this country. Since that time, a number of national efforts have been launched aimed at improving patient safety—and saving lives. Two of these initiatives are described below.

About the Leapfrog Group

The Leapfrog Group, a coalition of public and private organizations, collects and publishes information about hospital performance including four categories (or leaps) that it recommends hospitals should have in place to improve patient safety. These four categories include:

Leap 1—Computer Physician Order Entry (CPOE): Physicians enter patient prescriptions and other orders into computers linked to error prevention software.

Leap 2—Intensive Care Unit (ICU) Physician Staffing: ICUs are staffed by trained ICU specialists called “intensivists.”

Leap 3—High Risk Treatments or Evidence-based Hospital Referral (EHR): Hospital has proven outcomes or extensive experience with several high-risk procedures/conditions.

Leap 4—National Quality Forum (NQF) Safe Practices: Hospital is progressing on the additional 27 NQF measures. NQF has identified 30 practices that can have a major affect on the safety of patients in health care settings. Leaps one, two and three are included among these 30 practices. The other 27 practices—including communication among workers, doctor/patient communication and infection prevention—form the fourth leap.

Hospitals share information about their progress toward implementing the recommended safety practices by completing the Leapfrog Group’s Hospital Quality and Patient Safety Survey. Several Minnesota hospitals that participate in the Patient Choice program have made significant progress and are highlighted on the following pages. Results shown are from July 20, 2007.

Note: Due to lower patient volume and more scarce resources, some measures endorsed by The Leapfrog Group are harder for rural hospitals to implement. As a result, the survey is more applicable to hospitals in urban areas.

About the 5 Million Lives Campaign

The 5 Million Lives Campaign is a nationwide initiative launched by the Institute for Healthcare Improvement (IHI). It’s aimed at engaging U.S. hospitals in a commitment to implement 12 changes in care that are proven to improve patient care and prevent avoidable deaths including:

- **Deploying Rapid Response Teams**—at the first sign of patient decline and before a catastrophic cardiac or respiratory event in patients who are progressively failing outside the intensive care unit.
- **Preventing Adverse Drug Events (ADEs)**—by reconciling patient medications at every transition point in care.
- **Delivering Reliable, Evidence-based Care for Acute Myocardial Infarction**—to prevent deaths from heart attack.
- **Preventing Surgical Site Infections**—by reliably delivering the correct perioperative antibiotics at the proper time.
- **Preventing Central Line Infections**—by implementing a series of interdependent, scientifically grounded steps.
- **Preventing Ventilator-associated Pneumonia**—by implementing a series of interdependent, scientifically grounded steps.
- **Preventing Harm from High-alert Medications**—initially focusing on anticoagulants, sedatives, narcotics and insulin.
- **Reducing Surgical Complications**—by implementing changes in care recommended by the Surgical Care Improvement Project (SCIP).
- **Preventing Pressure Ulcers**—by using science-based guidelines.
- **Reducing Methicillin-resistant Staphylococcus Auereus (MRSA)**—by implementing scientifically proven infection control practices.
- **Delivering Reliable Evidence-based Care for Congestive Heart Failure (CHF)**—to reduce readmissions.
- **Getting Boards on Board**—by implementing processes to help hospital board of directors become more effective in accelerating care improvements.

Hospitals that participate in the Patient Choice network submitted information about their level of participation in this campaign by completing a survey developed by Patient Choice. Results were collected during the summer of 2007 and are summarized in the table on pages 10 and 11. More information about this campaign is available on www.ihl.org.

The Leapfrog Group’s Hospital Quality and Patient Safety Results

Leap 1—Computer Physician Order Entry (CPOE)

| | | |
|---|--|---|
| Hospital requires doctors to use computerized physician order entry systems or CPOE systems. CPOE systems used to order prescription medication and laboratory and imaging tests can greatly reduce the risk of prescription and text errors. | | |
| Fully implemented: | | Good progress toward implementing: |
| <ul style="list-style-type: none"> Abbott Northwestern Hospital Buffalo Hospital Fairview Ridges Hospital First Care Medical Services | <ul style="list-style-type: none"> Hennepin County Medical Center Mercy Hospital New Ulm Medical Center Park Nicollet Methodist Hospital | <ul style="list-style-type: none"> Regions Hospital United Hospital Unity Hospital Madelia Community Hospital Mayo Clinic – Rochester Methodist Mayo Clinic – St. Mary’s Meeker County Memorial Hospital |

Leap 2—Intensive Care Unit Physician Staffing

| | | |
|--|--|---|
| Hospital has an Intensive Care Unit (ICU) that is managed or co-managed by specially trained physicians called “intensivists” who staff the ICU during daytime hours. Numerous studies have shown that ICUs staffed by critical care physicians, that take care of patients at least eight hours per day, have lower death rates and shorter ICU stays for patients. | | |
| Fully implemented: | Good progress toward implementation: | Good early stage implementation: |
| <ul style="list-style-type: none"> Children’s Hospital – Minneapolis Children’s Hospital – St. Paul Fairview Ridges Hospital Gillette Children’s Hospital Mayo Clinic – St. Mary’s | <ul style="list-style-type: none"> North Memorial Hospital Park Nicollet Methodist Hospital Regions Hospital United Hospital | <ul style="list-style-type: none"> University of Minnesota Medical Center Abbott Northwestern Hospital Immanuel St. Joseph’s Hospital Mercy Hospital Riverwood Healthcare Center |

Leap 3—Evidence-based Hospital Referral (EHR)

| | | |
|---|--|---|
| Hospital has proven outcomes or extensive experience with specific high-risk procedures/conditions. Studies show that the more experience a hospital has performing a specific surgery, the less likely the patient is to be the victim of a preventable medical mistake. | | |
| These six procedures are: | | |
| 1) Coronary artery bypass graft | 3) Abdominal aortic aneurysm repair | 5) Pancreatic resection |
| 2) Coronary angioplasty | 4) Esophagectomy | 6) Bariatric surgery |
| | | 7) Aortic valve replacement |
| | | 8) High-risk delivery |
| Hospitals that have implemented one or more of the eight high-risk procedures: | Procedures that have been fully implemented: | Procedures that have good progress toward implementing: |
| • Abbott Northwestern Hospital | 4, 5, 8 | 2, 6 |
| • Children’s Hospital – Minneapolis | 8 (hospital does not perform 1-7) | |
| • Children’s Hospital – St. Paul | 8 (hospital does not perform 1-7) | |
| • Cuyuna Regional Medical Center | | 6 (hospital does not perform 1, 2, 3, 4, 5, 7, 8) |
| • Fairview Southdale Hospital | | 2, 6 (hospital does not perform 8) |
| • HealthEast St. Joseph’s Hospital | | 1, 6, 7 (hospital does not perform 8) |
| • Hennepin County Medical Center | 8 | 1, 2, 6, 7 |
| • Mayo Clinic – Rochester Methodist | 5 (hospital does not perform 1, 2, 3, 4, 6, 7) | |
| • Mayo Clinic – St. Mary’s | 4, 5 | 3, 6, 8 |
| • Park Nicollet Methodist Hospital | 6 (hospital does not perform 8) | 1, 2, 3, 4, 7 |
| • Regions Hospital | | 5, 6, 7 (hospital does not perform 8) |
| • St. Joseph’s Area Health Services | 6 (hospital does not perform 1, 2, 3, 7, 8) | |
| • United Hospital | | 6, 7, 8 |
| • Unity Hospital | 6 (hospital does not perform 1, 2, 5, 7, 8) | |
| • University of Minnesota Medical Center – Minneapolis Campus | | 1, 4, 5, 6, 7, 8 |

Note: To be eligible for in-network coverage for hospital services, Patient Choice participants should verify that the hospital is affiliated with their selected Care System prior to receiving services.

The Leapfrog Group’s Hospital Quality and Patient Safety Results

Leap 4—National Quality Forum Safe Practices

In 2003, the National Quality Forum (NQF) released its Safe Practices Consensus Report identifying 30 practices that can have major impact on the safety of patients in health care settings. Leaps one, two and three are included among these 30 practices. The other 27 identified practices form the fourth Leap.

Note: To be eligible for in-network coverage for hospital services, Patient Choice participants should verify that the hospital is affiliated with their selected Care System prior to receiving services.

About the Clinical Performance Information

Patient Choice collaborated with the Care Systems that make up the Patient Choice network to gather this data. Care Systems that chose to participate, submitted information during the summer of 2007. They were scored in each of the areas represented in this section of the guide, as well as on service and satisfaction levels (as reported by their patients). Patient Choice used the survey results to establish a corresponding "quality credit." This credit was incorporated into their cost tier assignment—giving Care Systems that performed well, the ability to be available to consumers at a lower cost.

About the Customer Service and Internet Capabilities Survey

The information highlighted in this guide was collected during the summer of 2007 using a survey developed by Patient Choice. The information was self-reported by each Care System.

About the Patient Satisfaction Survey Results

Patient Choice has contracted with the nationally recognized experts in consumer information at HealthGrades, Inc. to use their web-based patient satisfaction survey, CompareYourCare™ and to provide survey results.

CompareYourCare is a highly reliable set of survey questionnaires that have been tested in various settings across the United States. The results focus on comparisons and do not reflect an independent evaluation of whether Care Systems are actually good or not. Your own experiences may differ from those who completed the survey.

In addition, when considering a Care System's performance on this survey, keep in mind that it is a web-based survey and responses do not represent a random sample in the statistical sense. Care Systems, employers and others in the community were asked to encourage their patients, employees and constituents to take the online survey, which may have resulted in some sampling bias. However, only scores deemed statistically valid by HealthGrades, Inc. were reported.

Patient Choice continues to collect information using the CompareYourCare tool. For more information about the survey, or to complete a survey, go to www.patientchoiceselect.com and click on "CompareYourCare."
